SEO Demo Website Version 1.0.0 Release Notes

Release Date: June 8, 2024

We are excited to announce the launch of our SEO Demo Website, designed to showcase essential features and functionalities for effective SEO management. This initial release includes a range of tools to help users manage databases, display information, fetch weather data, and navigate the site seamlessly.

Key Features

- **Home Page:**
    - A welcoming homepage that provides an overview of the website's features and purpose.

- **About Page:**
    - Detailed information about the website's mission and objectives.

- **Contact Page:**
    - Contact information including email, phone number, and physical address.
    - A counter feature for demonstration purposes.

- **User Management (CRUD Operations):**
    - **List-MySQL:** Create, read, update, and delete operations on a user database using MySQL.

- **Data Display:**
    - **DataList-JSON:** Fetch and display user information from a JSON file.

- **Weather API:**
    - Fetch and display current weather information based on user input.

- **Sitemap:**
    - A comprehensive sitemap to facilitate easy navigation throughout the website.

Getting Started

- **Navigation:**
    - Use the top navigation bar to access different sections of the website effortlessly.

- **CRUD Operations:**
    - Visit the List-MySQL page to manage user information efficiently.

- **Data Fetching:**
  - Explore the DataList-JSON page to view user data fetched from a JSON file.
- **Weather Information:**
  - Use the Weather-API page to fetch and display current weather conditions.
